PROFESSIONAL SUMMARY

Results-driven **Senior Data Scientist** with over 5 years of experience in building scalable AI products across FMCG, E-commerce, and Automotive industries. Expert in end-to-end machine learning lifecycles, specializing in **Sales Forecasting, Inventory Optimization, and Pricing Strategy**. Proven track record of delivering high-impact solutions that drive revenue growth and operational efficiency through advanced statistical modeling and modern MLOps practices.

EXPERIENCE

HarmonyAI | Senior Data Scientist July 2024 – Present

- Leading the development of AI-driven **Sales Forecasting** and **Stock Optimization** products specifically tailored for the **FMCG sector**.
- Architecting state-of-the-art time-series models using the **Nixtla** ecosystem (MLForecast, NeuralForecast) to enhance prediction accuracy and supply chain resilience.
- Collaborating with cross-functional teams to translate complex business requirements into scalable production-grade AI solutions.

Hepsiburada | Data Scientist June 2022 – July 2024

- **Auto Hunt (Pricing Optimization):** Re-engineered and took full ownership of an optimization engine to balance price-commission pairs.
  - Achieved a 120% increase in weekly sales revenue and a 45% boost in commission revenue.
- **Deal Visibility (Scoring System):** Architected and deployed an end-to-end scoring service to prioritize high-engagement campaigns on the storefront.
  - Implemented using FastAPI and Kubernetes, ensuring minimal latency and predicting a 30% increase in product views.
- **ML Infrastructure:** Standardized the Data Science lifecycle by migrating workflows to GCP, Airflow, and MLflow, establishing a unified Kanban methodology and a custom Python utility library.

Ford Otosan | Data Analysis and Reporting Specialist March 2019 – June 2022

- **Manufacturing Info Systems:** Developed a "Digital Twin" of production lines using sensor data, improving factory efficiency by 30%.
- **Energy Management:** Built a mobile-responsive monitoring system for facility-wide resource consumption (Gas, Water, Electricity), recognized as a key corporate sustainability initiative.
- **Executive Dashboards:** Designed and implemented comprehensive executive dashboards for plant leadership, providing real-time visibility into critical factory KPIs and enabling data-driven strategic decision-making.

TECHNICAL SKILLS

- **Languages & Frameworks:** Python (Expert), SQL, Nixtla (MLForecast/NeuralForecast), FastAPI, OpenCV.
- **ML/Ops & Cloud:** GCP, AWS, Airflow, MLflow, Docker, Kubernetes (GKE), Git.
- **Data Engineering:** BigQuery, Clickhouse, MongoDB, CassandraDB, SybaseDB, ETL Processes.
- **Visualization:** Power BI, Tableau, Data Studio, SAP Analytics.

EDUCATION & CERTIFICATIONS

- **Sakarya University** | B.Sc. in Computer Engineering (GPA: 3.45/4.00)
- **Data Scientist Nanodegree** – Udacity
- **Neural Networks and Deep Learning** – Coursera

INTEREST & ACTIVITIES

- **Medium Author:** Writing on Explainable AI (SHAP), MLflow workflow optimization, and Financial Customer Segmentation.
- **Volunteer:** Mentored at "Bilim Seferberliği - YGA" and participated in TedXIzmit.
- **Sports & Hobbies:** Active in Sailing, Horse Riding and Tennis.
